

## COMMUNITY POWER PROGRAM: LOCAL BENEFITS

### Electricity Choice

### Cost Savings

### Innovative Programs

Community Power is a program that gives towns autonomy to choose electricity sources on behalf of their residents and businesses

## Benefits of Community Power

Enfield's Community Power Plan gives our community the ability to choose our energy sources rather than leaving that choice in the hands of the Utility Companies

Enfield is part of a coalition of 19 towns that can aggregate their purchases of electricity at a lower cost, generating savings for residents and businesses

Community Power will create opportunities for weatherization and energy efficiency programs and will encourage locally generated energy - including renewable energy - to meet Enfield's needs
